Report description:

Market Overview

Global Crude Sulfate Turpentine Market was valued at USD 285.35 Million in 2024 and is expected to reach USD 348.15 Million by 2030 with a CAGR of 3.57%. Crude Sulfate Turpentine is a derivative of the kraft pulping process and is rich in monoterpenes such as alpha-pinene and beta-pinene, which are widely used in fragrance, flavor, adhesive, and pharmaceutical industries. Demand for CST is closely tied to the performance of the pulp and paper sector, particularly in regions with a strong industrial forestry base such as North America, Europe, and parts of Asia-Pacific.

In recent years, the market has gained momentum due to rising global demand for bio-based and renewable chemical ingredients. While the market shows positive growth potential, it faces several challenges. CST is a highly odorous and flammable substance, requiring careful handling and specialized transportation and storage infrastructure. Furthermore, fluctuations in supply driven by changes in pulp production capacity and regional environmental regulations can affect CST availability and pricing.

Key Market Drivers

Growth in Fragrance Industry

The global fragrances market is projected to generate revenue of USD 62.11 billion in 2025. Growing consumer demand for personal expression and style is driving the increasing popularity of fragrances worldwide. The global crude sulfate turpentine (CST) market is witnessing substantial growth, strongly propelled by the rapid expansion of the fragrance industry. CST, a natural by-product derived during the kraft pulping process in the paper manufacturing sector, plays a crucial role as a raw material in

Scotts International. EU Vat number: PL 6772247784

www.scotts-international.com

producing several key aroma chemicals. These chemicals form the backbone of fragrance formulations used extensively across multiple consumer industries including personal care, cosmetics, household products, and luxury goods.

In parallel, there is a growing consumer inclination towards natural, organic, and eco-friendly ingredients in fragrances, aligning well with the bio-based origin of CST-derived chemicals. Demand is primarily driven by the following sectors: food and beverage (35%), fragrances, cosmetics, and aromatherapy (29%), household products (16%), and pharmaceuticals (15%). This consumer shift is encouraging fragrance manufacturers to source sustainable raw materials that reduce environmental impact, thereby increasing the strategic importance of CST in their supply chains.

Key Market Challenges

Volatility in Price of Raw Materials

A significant challenge facing the global crude sulfate turpentine (CST) market is the volatility in the price of raw materials, which directly impacts the availability and cost of CST. As CST is a by-product of the kraft pulping process, its supply is inherently linked to the pulp and paper industry's production levels, which can fluctuate due to seasonal variations, changes in demand for paper products, and shifts in raw wood availability. Additionally, environmental regulations and geopolitical factors affecting forestry and logging operations can disrupt the supply chain, further contributing to price instability.

This volatility creates uncertainty for manufacturers and end-users, complicating budgeting, procurement planning, and pricing strategies. Moreover, the dependence on natural feedstocks, which are subject to climatic and ecological factors, adds another layer of risk. To mitigate these challenges, stakeholders are increasingly focusing on supply chain diversification, strategic inventory management, and investing in technologies that optimize turpentine recovery and processing efficiency.

Key Market Trends

Expansion of Applications in Consumer Goods

A significant trend shaping the trajectory of the global crude sulfate turpentine (CST) market is the expansion of its applications across various consumer goods sectors. Traditionally valued primarily as a raw material for the fragrance and chemical industries, CST is increasingly being leveraged in a broader range of consumer products, reflecting evolving market dynamics and innovation in downstream processing.

In addition to personal care, CST derivatives are making significant inroads into the household goods segment. SYLVAPINE Terpene Products are derived from Crude Sulfate Turpentine (CST), a valuable extract obtained from softwood. Their application in eco-friendly cleaning agents, air fresheners, and disinfectants is rising due to their biodegradable nature and effective antimicrobial properties. This trend is reinforced by regulatory pressures and consumer preferences pushing for greener, non-toxic household products.

Key Market Players

- []dsm-firmenich
- []Ingevity
- []Kraton Corporation
- []ORGKHM Biochemical Holding
- []Pine Chemical Group
- []International Flavors & Fragrances, Inc. (IFF)
- []Symrise
- []WestRock Company
- []Stora Enso
- []Harting Technology Group

Report Scope

In this report, the Global Crude Sulfate Turpentine Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

- []Crude Sulfate Turpentine Market, By Product:
 - o Carene
 - o Terpineol
 - o Camphor

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- o Pinane Hydro peroxide
- o Pure alpha pinene
- o Limonene
- o Others

-Crude Sulfate Turpentine Market, By Application:

- o Additives
- o Adhesives
- o Solvents
- o Rubber Processing
- o Aroma Chemicals
- o Others

-Crude Sulfate Turpentine Market, By Region:

- o North America
 - United States
 - Canada
 - Mexico
- o Europe
 - France
 - United Kingdom
 - Italy
 - Germany
 - Spain
- o Asia Pacific
 - China
 - India
 - Japan
 - Australia
 - South Korea
- o South America
 - Brazil
 - Argentina
 - Colombia
- o Middle East & Africa
 - South Africa
 - Saudi Arabia
 - UAE

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Global Crude Sulfate Turpentine Market.
