### **Report description:**

The global flame lily extract market is being aided by the growth of the plant extract market. The plant extract market is expected to grow at a CAGR of 13.00% in the forecast period of 2025-2034 to reach a value of USD 127.00 Billion by 2034.

The Asia Pacific Region to Bolster the Growth of the Global Market for the Flame Lily Extract

The supply of flame lily extract is concentrated in the Asia Pacific and African regions such as Sri Lanka, Southern Malaysia, Africa, and Myanmar. Within India, the major flame lily extract producing regions include Maharashtra, Tamil Nadu, Rajasthan, Kerala, Goa, and Karnataka, among other states. Owing to the favourable environmental conditions within these regions, they present a significant growth potential for the market.

The overall market is being propelled forward by rising innovations in the industry. Product innovations in the market are more concentrated towards the process development, which are focused on higher colchicine content extraction. The flame lily plant flowering can be witnessed between September and October months, and they are usually harvested 170 to 180 days post-planting. The seeds, leaves, and roots of flame lily are the potential sources of the flame lily extract.

Flame Lily Extract: Market Segmentation

Flame lily extract is a derivative extracted from the processing of a tuberous herb called *Gloriosa superba*. It is well-known for its use in alkaloid therapy for wounds, haemorrhoids, cancer, and leprosy. The rich content of Colchicine material, which has many therapeutic uses, has propelled the significance of flame lily extract. The quality of the colchicine varies depending on the methods used for extraction and drying it.
