### **Report description:**

The global gold nanoparticles market demand stood at 2230.99 Kilo Grams in 2024. The gold nanoparticles market is further expected to grow at a CAGR of 10.25% in the forecast period of 2025-2034, reaching a value of 5919.48 Kilo Grams by 2034.

The gold nanoparticles market growth is driven by the increased use of metal nanoparticles in medical and dental practice, especially in target imaging and diagnostics. Metal nanoparticles have exceptional properties, such as high absorption with less bone and tissue interference, high ability to scatter, and strong optoacoustic signals for medical applications. Due to their selective accumulation in tumour cells and high biocompatibility, nanoparticles are also widely accepted in targeted cancer imaging and therapy.
