### **Report description:**

The India software as a service (SaaS) market stood at a value of around USD 7.18 Billion in 2024. The market is further anticipated to grow at a CAGR of 27.30% in the forecast period of 2025-2034 to attain USD 80.24 Billion by 2034.

Rising Demand for SaaS in the IT and Telecom Industry to Bolster the Growth of the Software as a Service Industry in India

Based on end use sector, the IT and telecom industry accounts for a significant share in the SaaS industry. The growth can be attributed to the increased usage of internet across the country and the growing subscriber base in the telecommunications market. This has been propelling the demand for SaaS for software licensing in the IT and telecom industry. Over the forecast period, the increasing penetration of smartphones and the low data cost are likely to bolster the usage of cloud computing in India, which, in turn, is expected to augment the growth of the overall market. The multitenant architecture of SaaS, which means that a single version of SaaS solution can be used for all customers, is likely to enhance the scalability and popularity of SaaS solutions in India.

Increasing Demand from Medium and Large Enterprises to Boost the Software as a Service Industry Growth in India

On the basis of organisation size, the medium and large enterprises account for a significant share in the market, as the demand for SaaS solutions is significantly high from this segment. In medium and large enterprises, SaaS solutions are required for several business applications, such as office software, messaging software, payroll processing software, customer relationship management (CRM) , DBMS software, management software, and enterprise resource planning (ERP) , among others. Meanwhile, the growth of SMEs in India has been significant and is likely to flourish in the forecast period. This is likely to bolster the demand for SaaS in SMEs too in the forecast period, thus, aiding the industry growth.
