### **Report description:**

The global isoamyl acetate market is being driven by the growing consumption of processed food products. Aided by the rising technological advancements, the market is expected to witness a further growth in the forecast period of 2025-2034, growing at a CAGR of 3.20%.

#### Wide Applications of Isoamyl Acetate in Various Industries to Aid the Market Growth

Isoamyl acetate is widely used as a flavouring agent in the food and beverage industry to confer banana flavour in food products. Banana oil, which is a solution of isoamyl acetate in ethanol, is commonly utilised as an artificial flavour. Besides this, it is used in more than 40 flavours, ranging from apple to pina colada, and even coffee. The increasing demand for synthetic flavours owing to the thriving food and beverages industry is aiding the industry growth. Moreover, the chemical is also used as a solvent in some varnishes and nitrocellulose lacquers. The growing demand for solvents from various end-use industries like paints and coatings, pharmaceuticals, and cosmetics will further enhance the overall market growth.

Region-wise, the Asia Pacific is expected to witness a robust growth over the forecast period owing to the rising demand for processed food products, particularly in the emerging nations like India and China.

#### Isoamyl Acetate: Market Segmentation

Isoamyl acetate, variously known as isopentyl acetate, is the ester formed from isoamyl alcohol and acetic acid. It is a colourless liquid with a strong, pleasant odour that is similar to both banana and pear. It is only slightly miscible in water, but readily soluble in most organic solvents. It is obtained via the acid catalysed reaction (Fischer esterification) of isoamyl alcohol and glacial acetic acid in the presence of sulphuric acid.

Based on application, the industry is divided into:

- Solvent
- Flavouring Agent
- Others

Based on end use, the industry can be segmented into:

- Food and Beverages
- Cosmetics and Personal Care
- Textiles
- Pharmaceuticals
- Others

The regional markets for the product include:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

Increasing Demand for Packaged and Convenient Food Products to Augment the Isoamyl Acetate Industry Growth

The growing popularity of packaged and ready-to-eat food products is driving the demand for synthetic flavours in the food industry, which is propelling the growth of the isoamyl acetate industry. This is further supported by the rising global population, changing dietary patterns, and rising disposable incomes. The growing consumption of alcoholic and non-alcoholic beverages will further contribute to the industry growth. Moreover, the cosmetics and personal care sector is also emerging as one of the major consumers of isoamyl acetate, which is likely to aid in the market growth in the coming years. Owing to technological advancements and growing R&D activities, the manufacturers are enhancing their portfolio and launching new products. This is expected to have a positive effect on the expansion of the global isoamyl acetate industry. However, the growing preference for natural products may hamper the industry growth over the forecast period.

Key Industry Players in the Global Isoamyl Acetate Market

The report gives a detailed analysis of the following key players in the global isoamyl acetate market, covering their competitive landscape, capacity, and latest developments like mergers, acquisitions, and investments, expansions of capacity, and plant turnarounds:

- Chemoxy International Ltd
- Dow Chemical Company
- Ernesto Ventos S.A.
- Nimble Technologies Pvt Ltd
- Others

The comprehensive EMR report provides an in-depth assessment of the market based on the Porter's five forces model along with giving a SWOT analysis.
