### **Report description:**

The market for nepheline syenite reached a volume of 5062.00 TMT in 2024. The industry is further expected to grow with the rising demand for demand for glass and ceramics.

Asia Pacific to Boost the Global Nepheline Syenite Market

The global nepheline syenite market is significantly supported by the growth in the Asia Pacific region. With an overall-rise in the usage of glass and ceramics in the ever-rising construction industry and other consumer-end goods, especially in large countries like India, Brazil, and China, where the market growth rate is observed to be the fastest, there will be a substantial rise in the market for this mineral. Despite the restrictions on transport due to the COVID-19 pandemic, the North American market has consistently been observed to be the one of the largest markets for nepheline syenite and has been steadily rising each year. Better opportunities will be observed as more and more key players in the industry will attempt to tap into the demand from emerging markets in the post-COVID-19 world. These factors are likely to provide further impetus to the growth of the global industry.

Nepheline Syenite: Market Segmentation

Nepheline syenite is a mineral obtained from igneous rocks with a composition of mainly nepheline and feldspar, both of which are silica-based compounds. Its higher content of alkali and relatively lower content of silica differentiates it from other similar compounds. Nepheline syenite is increasingly being used as a replacement for feldspar to manufacture ceramics and glass.

The major forms of nepheline syenite are as follows:

- Powder
- Granules

Depending on the application, the nepheline syenite market can be segmented as follows:

- Coatings and Polymers
- Glass
- Ceramic
- Refractories
- Others

The market for nepheline syenite is found in:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

#### Process Optimisation and Environmental Regulations Aid the Global Nepheline Syenite Demand

The global market growth is being driven by various environmental regulations imposed by the government and the authorities. The addition of nepheline syenite in the glass-making process makes the end-product tougher due to lowering of viscosity in the manufacturing process. Its unique composition (greater alkali content and lower silica content) makes glass less brittle and more resistant to scratches. It also lowers the melting temperature which means lesser fuel is required per unit batch of glass. This process optimisation and eco-friendly advantage increases the demand for this mineral. Other factors likely to boost the market growth are rising urbanisation, growing industrialisation, and the thriving demand from the application sectors of the product.

#### Key Industry Players in the Global Nepheline Syenite Market

The report gives a detailed analysis of the following key players in the global nepheline syenite market, covering their competitive landscape, capacity, and latest developments like mergers, acquisitions, and investments, expansions of capacity, and plant turnarounds:

- SCR-Sibelco NV
- 3M Co.
- Anglo Pacific Minerals Ltd.
- Others

The comprehensive report looks into the macro and micro aspects of the industry. The EMR report gives an in-depth insight into the market by providing a SWOT analysis as well as an analysis of Porter's Five Forces model.
