Report description:

The North America leaf blower market is projected to grow at a CAGR of 4.00% between 2025 and 2034.

North America to Dominate the Leaf Blower Market Globally in the Forecast Period

North America has been the largest market of the global leaf blower industry in recent years, accounting for about half of the market's sales. The leaf blower is a lawn tool, which is mainly used to preserve the pristine condition of lawns by trimming, pruning, and preserving the pristine condition of lawns. The production of advanced product lines with high performance, improved power capacities, and long battery run-time are primarily responsible for the high growth opportunities in North America. Garden equipment and tools are expected to see a major increase in demand as the number of stadiums, golf courses, and public parks increases. Leaf blowers are increasingly being used to clean linoleum floors, brick-paved driveways, tiles, cement areas, and wooden floors. As a result, manufacturers are focusing on developing professional leaf blowers with a variety of revolutionary features, including turbo air cleaning and anti-vibration techniques. This is expected to boost the growth of the industry over the forecast period.

Growing Incremental Growth of Handheld Leaf Blower to Drive Market Growth

Leaf blowers make it easy to remove and disinfect leaves and debris from garden areas. Handheld leaf blowers are the most compact, efficient, and cost-effective, and they are the most common option in the home. Handheld leaf blowers are more maneuverable and lighter than standard leaf blowers, making them a popular option among homeowners. The global leaf blower market is projected to have increased sales in the forecast period, with handheld leaf blowers accounting for the majority of the market share. Handheld blowers come with a variety of features, including easy start mechanisms, mulching capability, and variable speed control. These features make it easier to dispose of leaves, which is why specialist service providers are increasingly using them. Electric and gas-driven handheld blowers are available, with the electric versions being powered by a battery or a power cord. The rising demand for handheld leaf blowers is expected to boost the market growth over the forecast period.
