## Global Tert-Butanol Market Analysis

Tert-butanol is steadily making its way into the biomedical industry as the preferable freezing agent. The constantly evolving nature of the pharmaceutical industry and the increase of research activities has made it necessary to conserve vaccines, blood samples, purified proteins, and many other biological materials. As a high vapour pressure, low toxicity, and low melting solvent, tert-butanol serves as an optimal freezing agent. Manufacturers capitalize on this trend by strengthening their ties and working with the pharmaceutical industry's raw material providers and service providers to exploit the full potential of the tert-butanol market. The production of high purity grade tert-butanol, suitable for pharmaceutical applications, is given considerable importance due to the high demand for the product.
