### **Report description:**

The global video intercom devices market size reached around USD 28.91 Billion in 2024. The market is projected to grow at a CAGR of 13.20% between 2025 and 2034 to reach nearly USD 99.89 Billion by 2034.

The global video intercom devices industry is being driven by the growing demand for enhanced security equipment, the development of advanced tools with integrated audio and video features, and the growing automation in building infrastructure. These devices help the user by transmitting audio and visual information of a visitor to the loudspeakers, telephones, etc., which can be further accessed by the user.

### Market Segmentation

Video intercom devices are widely installed as audiovisual communication systems, for security purposes, at the entry-exit points of offices, buildings, societies, etc. The global video intercom devices industry can be divided based on segments like technology, types, controls, systems, applications, and regions.

### Breakup by Technology

- Analogue
- IP-Based

### Breakup by Type

- Door Entry Systems

#### Market Analysis

With the advancement in technology, the equipment designed for security purposes are witnessing increased development and innovation, which is aiding the industry growth. The growing adoption of automation in building structures is driving the demand for video intercom devices in residential as well as commercial buildings. The increasing urbanisation and rising disposable incomes, particularly in emerging economies are providing enhanced growth opportunities to the industry for its development. Further, the increased construction of smart homes and its rising popularity among consumers, coupled with the various initiatives by the government towards the development of smart cities is anticipated to aid the industry growth over the forecast period. However, the high installation and maintenance cost of video intercom devices may hamper the industry growth in the future.

The door entry systems segment, among other types, dominated the global video intercom devices industry in 2020 owing to its advantages like enhanced digital sounds and noise-cancelling features. The password access segment is expected to account for the largest share in the industry. Region-wise, North America accounted for the largest share in the industry in 2020 while the Asia Pacific is expected to witness the highest CAGR over the forecast period owing to increased urbanisation in the region.
