Report description:

The global hospital linen supply and management services market size reached USD 10.8 Billion in 2024. Looking forward, IMARC Group expects the market to reach USD 14.4 Billion by 2033, exhibiting a growth rate (CAGR) of 3.16% during 2025-2033.

Hospital linen supply and management services are facilities offered by third-party organizations to ensure proper hygiene of towels, screens, curtains, mattresses, blankets, pillow covers, bedsheets, doctor coats, theatre cloths, and tablecloths. These services assist in managing clothes and reducing the risk of cross-contamination as compared to the in-house laundry that involves huge installation and maintenance overhead. Consequently, healthcare facilities worldwide are outsourcing hospital linen supply and management services to focus on their core operations and save time and costs for upgrading equipment.

The rising demand for sophisticated healthcare facilities due to the growing prevalence of different diseases that require surgical interventions represents one of the main factors influencing the market. Apart from this, the easy availability of customized non-woven linens that are robust, economical, and lightweight and can be easily disinfected is also catalyzing the demand for hospital linen supply and management services across the globe. Furthermore, the leading market players are providing value-added services, such as uniform rental and waste removal systems, to attract a wider consumer base. The increasing set-up of government hospitals and private clinics is anticipated to present lucrative business opportunities to these players in the coming years and drive the market.
