Report description:

The global medical lifting slings market size reached USD 1,064.4 Million in 2024. Looking forward, IMARC Group expects the market to reach USD 2,327.0 Million by 2033, exhibiting a growth rate (CAGR) of 8.63% during 2025-2033.

Medical lifting slings are assistive devices that help in the manual and mechanical transfer of patients that are unable to move. They also assist in creating an optimal working condition and providing quality care while giving the user a sense of security and control. They are made from a variety of materials, including nylon, padded, mesh, canvas, polypropylene, and cotton. They are durable and easy to use and provide optimal functionality to both patients and caregivers. As a result, they are widely utilized in hospitals and home care centers to transfer patients safely from the bed, toilet, and wheelchair. Presently, leading manufacturers are introducing medical lifting slings that eliminate the risk of musculoskeletal injuries and accidents caused during the lifting, repositioning, and transferring of patients.

Medical Lifting Slings Market Trends:

Road accidents and traumatic experiences are the leading causes of disability that can injure the spinal cord, fracture bones and limbs, and lead to brain damage. This, in confluence with a considerable rise in the number of fatal road accidents, represents one of the key factors bolstering the market growth. In addition, the increasing prevalence of arthritis, obesity, fibromyalgia, osteoporosis, neurological disorders, and Parkinson's disease, which can escalate the risk of developing mobility impairment, is

contributing to market growth. Moreover, the incidence of physical disabilities gradually increases with advancing age. This, in confluence with the growing geriatric population across the globe, is positively influencing the need for assistive devices like medical lifting slings to obtain mobility. Apart from this, several market players are launching novel designs integrated with advanced systems to expand their product portfolio and existing market share. This is anticipated to create a positive outlook for the market.
