**Report description:**

Market Overview

Saudi Arabia Electronic Bill Presentment Payment Market was valued at USD 4.74 Billion in 2024 and is anticipated to reach USD 8.71 billion by 2030 with a CAGR of 10.5% through 2030. The Electronic Bill Presentment and Payment (EBPP) market in Saudi Arabia is experiencing significant growth, propelled by the nation's accelerated digital transformation and a burgeoning population of tech-savvy consumers. With an increasing preference for digital financial transactions, the demand for efficient and secure electronic billing solutions has surged. The widespread adoption of smartphones and internet services has facilitated easy access to digital payment platforms, further contributing to the market's upward trajectory.

Additionally, the government's initiatives to promote a cashless economy and the integration of advanced technologies in the financial sector are fostering a favorable ecosystem for the expansion of the EBPP market. As businesses and consumers alike embrace the convenience and speed offered by electronic billing and payment systems, the Saudi Arabian EBPP market is poised for sustained growth, representing a pivotal shift towards a more digitized and streamlined financial landscape.

Key Market Drivers

Digital Transformation Initiatives

Saudi Arabia has embarked on an ambitious digital transformation journey, driven by the imperative to diversify its economy and reduce its reliance on oil revenues. At the core of this sweeping transformation is a strategic vision encapsulated in initiatives like Vision 2030, which extends its transformative influence across various sectors, including finance. The overarching goal is to elevate efficiency and accessibility to unprecedented levels. Within the domain of electronic billing and payments, this national commitment to digital evolution has served as a powerful catalyst, propelling the development and widespread adoption of cutting-edge solutions. Companies operating in the Saudi Arabian landscape are proactively embracing this digital imperative, with a discernible trend towards the integration of advanced digital payment systems into their operational frameworks.

- Over 94% of Saudi citizens use the internet (CITC, 2024), enabling rapid digital payment penetration.

- The Kingdom recorded 1.9 billion e-payment transactions in 2023, a 25% increase YoY.

- The government aims for 70% of all transactions to be cashless by 2030, driving EBPP integration.

- 90% of utility providers now offer digital billing platforms.

- Mobile banking usage grew to 76% of the adult population, creating readiness for EBPP adoption.

This strategic alignment with the national agenda underscores a collective commitment to fostering a modern, technology-driven economy that not only keeps pace with global digital trends but positions Saudi Arabia at the forefront of innovation and efficiency in the financial landscape. As the government continues to champion digitization, the ripple effect is transforming how businesses conduct financial transactions, reinforcing Saudi Arabia's trajectory towards a more agile, tech-savvy economic ecosystem.

#### Key Market Challenges

##### Limited Digital Literacy and Awareness

One of the significant challenges hindering the widespread adoption of electronic billing and payment solutions in Saudi Arabia is the limited digital literacy and awareness among certain segments of the population. While the younger generation is increasingly tech-savvy, there remains a portion of the population, particularly in more traditional or rural areas, with limited exposure to digital technologies. This digital divide poses a challenge as the success of EBPP systems relies on a broad user base. Bridging this gap requires targeted educational initiatives and awareness campaigns to familiarize all segments of society with the benefits and usage of electronic billing platforms, ensuring inclusivity in the digital financial landscape.

#### Key Market Trends

##### Mobile-First Solutions and App Integration

A notable trend in the Saudi Arabian EBPP market is the increasing emphasis on mobile-first solutions and the integration of electronic billing and payment functionalities within mobile applications. With the majority of the population relying heavily on smartphones, businesses and financial institutions are capitalizing on this trend by developing user-friendly, feature-rich mobile apps that facilitate seamless bill management and payments. The integration of EBPP features into popular mobile applications not only enhances user convenience but also aligns with the growing preference for on-the-go financial transactions. This trend reflects the strategic focus on creating a holistic and integrated digital experience for consumers, driving the evolution of mobile-centric EBPP solutions in the Saudi market.

#### Key Market Players

- STC Pay (Saudi Telecom Company)

- mada Pay (Saudi Payments Network)

- PayTabs Saudi Arabia

- Tap Payments

- PayFort International

- HyperPay

- PayTabs

- PayTabs Bahrain

- PayTabs Egypt

- PayTabs UAE

#### Report Scope:

In this report, the Saudi Arabia Electronic Bill Presentment Payment Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

**Scotts International. EU Vat number: PL 6772247784**

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Formulation of the Scope
- 2.4. Assumptions and Limitations
- 2.5. Sources of Research
  - 2.5.1. Secondary Research
  - 2.5.2. Primary Research
- 2.6. Approach for the Market Study
  - 2.6.1. The Bottom-Up Approach
  - 2.6.2. The Top-Down Approach
- 2.7. Methodology Followed for Calculation of Market Size & Market Shares
- 2.8. Forecasting Methodology
  - 2.8.1. Data Triangulation & Validation
3. Executive Summary
4. Impact of COVID-19 on Saudi Arabia Electronic Bill Presentment Payment Market
5. Voice of Customer
6. Saudi Arabia Electronic Bill Presentment Payment Market Overview
7. Saudi Arabia Electronic Bill Presentment Payment Filters Market Outlook
  - 7.1. Market Size & Forecast
    - 7.1.1. By Value
  - 7.2. Market Share & Forecast
    - 7.2.1. By Product (Electronic Bill Presentment, Electronic Bill Payment, Electronic Bill Posting)
    - 7.2.2. By Application (Billers, Consumers, Bill Consolidator, Banks & Financial Institutions)
    - 7.2.3. By Channel (Application Programming Interface (API), Mobile, Web, Email, IVR, POS, Kiosk)
    - 7.2.4. By End Use Industries (BFSI, Insurance, Healthcare)
    - 7.2.5. By Region (Riyadh, Makkah, Madinah, Jeddah, Tabuk, Eastern Province, Rest of Saudi Arabia)
  - 7.3. By Company (2024)
  - 7.4. Market Map
8. Riyadh Electronic Bill Presentment Payment Market Outlook
  - 8.1. Market Size & Forecast
    - 8.1.1. By Value
  - 8.2. Market Share & Forecast
    - 8.2.1. By Product
    - 8.2.2. By Application
    - 8.2.3. By Channel
    - 8.2.4. By End Use Industries
9. Makkah Electronic Bill Presentment Payment Market Outlook
  - 9.1. Market Size & Forecast
    - 9.1.1. By Value
  - 9.2. Market Share & Forecast
    - 9.2.1. By Product
    - 9.2.2. By Application
    - 9.2.3. By Channel
    - 9.2.4. By End Use Industries
10. Madinah Electronic Bill Presentment Payment Market Outlook
  - 10.1. Market Size & Forecast
    - 10.1.1. By Value
