- Team License (1-7 Users) \$5250.00
- Site License \$6500.00
- Corporate License \$8750.00

Report description:

IoT Testing Market Analysis

The IoT Testing Market size is estimated at USD 3.37 billion in 2025, and is expected to reach USD 15.03 billion by 2030, at a CAGR of 32.34% during the forecast period (2025-2030).

This rapid expansion mirrors rising digital-transformation targets, stricter cybersecurity mandates, and the swelling universe of connected endpoints that now permeate industrial and consumer settings. Enterprises are migrating from reactive to predictive validation models because a single device failure can stall production lines, trigger safety incidents, and invite regulatory penalties running into millions. Low-latency requirements born of 5G and edge computing are intensifying demand for testbeds that can capture millisecond-level performance variations in mission-critical workloads. At the same time, digital-twin environments are cutting hardware costs by letting developers model full device lifecycles in software while maintaining traceability to real-world conditions.

Global IoT Testing Market Trends and Insights

Explosion in Connected IoT Endpoints

China reported 2.57 billion active IoT terminals by August 2024, underscoring the scale shift that now drives exponentially larger test matrices. A single smart factory can blend Zigbee sensors, LoRaWAN gateways, and 5G RedCap robots, forcing validation

www.scotts-international.com

teams to assure seamless interoperability across every protocol permutation. Hyundai and Samsung have already proven private 5G RedCap production lines that demand sub-10 millisecond latency verification. As mixed-generation fleets proliferate, each new device SKU multiplies the combinations that must be certified, compelling enterprises to invest in unified test-automation frameworks able to scale without sacrificing coverage. The IoT testing market must therefore support legacy 4G modules and future 5G endpoints in one configurable environment.

Escalating Security and Privacy Regulations

From August 2025, the European Union's Radio Equipment Directive obliges every internet-connected product to pass cybersecurity conformance testing before sale. The harmonized EN 18031 series now prescribes network protection, data privacy, and fraud-prevention test cases, expanding compliance workloads well beyond functional checks. In the Gulf region, mandatory biometric SIM registration in Saudi Arabia and the UAE is reshaping connectivity-test protocols. Enterprises unable to field in-house security expertise are increasingly outsourcing validation, steering demand toward managed-service providers inside the IoT testing market.

Rising Device/Protocol Complexity

Contemporary deployments mix Wi-Fi 6E sensors, Bluetooth 5.4 beacons, LoRaWAN meters, NB-IoT trackers, and 5G RedCap modems, each demanding distinct tooling. Automotive semiconductor content is projected to hit USD 1,200 per car by 2030, doubling validation points across control units and telematics gateways. Every new protocol stacks onto the existing matrix, lengthening test cycles and challenging resource-constrained labs. Unless automation, virtualization, and AI-enabled prioritization shrink cycle times, this complexity could slow spend within the IoT testing market.

Other drivers and restraints analyzed in the detailed report include:

Shift Toward DevOps and Continuous Testing Pipelines / 5G/Edge-Computing Driven Low-Latency Use-Cases / Lack of Global Interoperability Standards /

For complete list of drivers and restraints, kindly check the Table Of Contents.

Segment Analysis

Professional services dominated 2024 revenue with a 61% stake as enterprises leaned on external specialists for multifaceted protocol, security, and compliance needs. Their strength stems from deep benches versed in 5G, RedCap and EU cyber-conformance testing. Managed services, however, are forecast to rise 18.7% annually because manufacturers and fleet operators prefer subscription contracts that guarantee 24/7 lab capacity. HCL Technologies reported USD 13.3 billion FY24 revenue, attributing strong growth to its managed testing portfolios. This transition is redefining delivery models across the IoT testing market and widening demand for fully outsourced validation centers.

The IoT testing market size for managed services is projected to jump from USD 1.31 billion in 2025 to USD 6.05 billion by 2030, mirroring the steep complexity curve that favors dedicated external labs. Global system integrators are investing in remote-accessible device farms so clients can queue tests around the clock without shipping hardware.

Functional validation retained the largest 27.3% revenue slice in 2024 because projects still begin with connectivity and data-flow checks. Nevertheless, security testing is expected to post a 22.5% CAGR through 2030. The IoT testing market must now execute penetration simulations, firmware-integrity scans, and encrypted-channel evaluations aligned with EN 18031 and US FDA pre-market submissions. Applus+ opened a new European cyber-lab in 2024 to fast-track ETSI 303 645 certification demand.

www.scotts-international.com

Security services alone could capture 31% IoT testing market share by 2030 as regulatory fines push device makers to bake validation into every build. In parallel, performance-stress and network-handover tests stay critical for 5G URLLC scenarios, keeping them relevant, though not as fast-growing.

The IoT Testing Market Report is Segmented by Service Type (Professional and Managed), Testing Type (Functional Testing, Performance Testing, Network Testing, Compatibility Testing, Security Testing, and Usability Testing), Application (Smart Building and Home Automation, Capillary Networks Management, and More) End-User Industry (Retail, Manufacturing, Healthcare, Energy and Utilities, IT and Telecom, and More), and Geography.

Geography Analysis

North America led with 38.6% revenue in 2024 as enterprises adopted DevOps pipelines that embed testing from design through production. San Antonio's SmartSA initiative demonstrates municipal-grade pilots where every lamp-post sensor must clear interoperability and security gates before field deployment. The IoT testing market benefits from established certification ecosystems and well-funded aerospace, automotive, and industrial-automation clients.

Asia Pacific is predicted to post the fastest 15.8% CAGR. China's Xiong'an 10 Gbps backbone and Beijing's vehicle-road-cloud pilots elevate demand for massive-scale conformance labs. Japan's Society 5.0 and South Korea's USD 101 million national smart-city fund are adding thousands of devices that must be profiled under region-specific telecom and privacy rules. The IoT testing market size in Asia Pacific could cross USD 5 billion by 2030 as local vendors integrate cloud-native automation.

Europe maintains solid growth anchored in its rule-first posture. Radio Equipment Directive cybersecurity clauses require third-party labs to run penetration tests before CE marking. Smart-meter rollouts hit 60% for electricity and 45% for gas in 2023, driving sustained validation work for utility suppliers. Nordic telcos are opening shared 5G IoT labs, exemplified by Telenor's Karlskrona facility that grants global device makers plug-and-play access to Swedish networks. These frameworks ensure the IoT testing market in Europe remains compliance-centric and resilient.

List of Companies Covered in this Report:

IBM / Keysight Technologies / HCL Technologies / Cognizant / Capgemini / Infosys / Tata Consultancy Services / Accenture / Wipro / Qualitest Group / Spirent Communications / AFour (ACL Digital) / Apica Systems / Praetorian Security / Novacoast / Trustwave (Singtel) / Happiest Minds / Vector Informatik / Eurofins Digital Testing / SmartBear / VIAVI Solutions /

Table of Contents:

1 INTRODUCTION

1.1 Study Assumptions and Market Definition

1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

4 MARKET LANDSCAPE

4.1 Market Overview

4.2 Market Drivers

4.2.1 Explosion in connected IoT endpoints

4.2.2 Escalating security and privacy regulations

4.2.3 Shift toward DevOps and continuous testing pipelines

4.2.4 5G/edge-computing driven low-latency use-cases

4.2.5 Digital-twin-based "virtual testing" adoption

4.2.6 Sustainability mandates for energy-efficient devices

4.3 Market Restraints

4.3.1 Rising device/protocol complexity

4.3.2 Lack of global interoperability standards

4.3.3 Scarcity of multi-access edge test beds

4.3.4 Data-sovereignty rules slowing cross-border testing

4.4 Value/Supply-Chain Analysis

4.5 Regulatory Landscape

4.6 Technological Outlook

4.7 Testing Types Overview

4.8 Porter's Five Forces Analysis

4.8.1 Bargaining Power of Suppliers

4.8.2 Bargaining Power of Buyers

4.8.3 Threat of New Entrants

4.8.4 Threat of Substitutes

4.8.5 Intensity of Competitive Rivalry

4.9 Assessment of COVID-19 and Post-Pandemic Impacts

5 MARKET SIZE AND GROWTH FORECASTS (VALUE)

5.1 By Service Type

5.1.1 Professional

5.1.2 Managed

5.2 By Testing Type

5.2.1 Functional Testing

5.2.2 Performance Testing

5.2.3 Network Testing

5.2.4 Compatibility Testing

5.2.5 Security Testing

5.2.6 Usability Testing

5.3 By Application

5.3.1 Smart Building and Home Automation

5.3.2 Capillary Networks Management

5.3.3 Smart Utilities (Energy / Water)

5.3.4 Vehicle Telematics and Connected Vehicles

5.3.5 Smart Manufacturing / Industrial IoT (IIoT)

5.4 By End-user Industry

5.4.1 Retail

5.4.2 Manufacturing

Scotts International. EU Vat number: PL 6772247784

www.scotts-international.com

- 5.4.3 Healthcare
- 5.4.4 Energy and Utilities
- 5.4.5 IT and Telecom
- 5.4.6 Government and Smart Cities
- 5.4.7 Transportation and Logistics
- 5.4.8 Other Industries
- 5.5 By Geography
 - 5.5.1 North America
 - 5.5.1.1 United States
 - 5.5.1.2 Canada
 - 5.5.1.3 Mexico
 - 5.5.2 South America
 - 5.5.2.1 Brazil
 - 5.5.2.2 Argentina
 - 5.5.2.3 Rest of South America
 - 5.5.3 Europe
 - 5.5.3.1 United Kingdom
 - 5.5.3.2 Germany
 - 5.5.3.3 France
 - 5.5.3.4 Italy
 - 5.5.3.5 Spain
 - 5.5.3.6 Rest of Europe
 - 5.5.4 Asia-Pacific
 - 5.5.4.1 China
 - 5.5.4.2 Japan
 - 5.5.4.3 India
 - 5.5.4.4 South Korea
 - 5.5.4.5 Rest of Asia-Pacific
 - 5.5.5 Middle East and Africa
 - 5.5.5.1 Middle East
 - 5.5.5.1.1 United Arab Emirates
 - 5.5.5.1.2 Saudi Arabia
 - 5.5.5.1.3 Turkey
 - 5.5.5.1.4 Rest of Middle East
 - 5.5.5.2 Africa
 - 5.5.5.2.1 South Africa
 - 5.5.5.2.2 Nigeria
 - 5.5.5.2.3 Rest of Africa

6 COMPETITIVE LANDSCAPE

- 6.1 Market Concentration
- 6.2 Strategic Initiatives and Funding
- 6.3 Market Share Analysis
- 6.4 Company Profiles (includes Global level Overview, Market level overview, Core Segments, Financials as available, Strategic Information, Market Rank/Share, Products and Services, Recent Developments)
 - 6.4.1 IBM
 - 6.4.2 Keysight Technologies

Scotts International. EU Vat number: PL 6772247784

- 6.4.3 HCL Technologies
- 6.4.4 Cognizant
- 6.4.5 Capgemini
- 6.4.6 Infosys
- 6.4.7 Tata Consultancy Services
- 6.4.8 Accenture
- 6.4.9 Wipro
- 6.4.10 Qualitest Group
- 6.4.11 Spirent Communications
- 6.4.12 AFour (ACL Digital)
- 6.4.13 Apica Systems
- 6.4.14 Praetorian Security
- 6.4.15 Novacoast
- 6.4.16 Trustwave (Singtel)
- 6.4.17 Happiest Minds
- 6.4.18 Vector Informatik
- 6.4.19 Eurofins Digital Testing
- 6.4.20 SmartBear
- 6.4.21 VIAVI Solutions

7 MARKET OPPORTUNITIES AND FUTURE OUTLOOK

7.1 White-space and Unmet-need Assessment
