Report description:

Mexico In-Vitro Diagnostics Market Analysis

The Mexico in vitro diagnostics market size is valued at USD 2.22 billion in 2025 and is forecast to reach USD 3.14 billion by 2030, expanding at a 7.18% CAGR. Growth reflects steady modernization of public procurement, rising chronic-disease testing volumes, and accelerated adoption of point-of-care platforms focused on underserved regions. The New Consolidated Procurement Model is steering MXN 130 billion (USD 6.86 billion) toward medical supplies for 26 public health institutions, giving scale advantages to suppliers that can satisfy large-lot tenders. Multinational firms with FDA, Health Canada, or Japan clearances enjoy shorter regulatory routes under COFEPRIS equivalency provisions, while domestic players concentrate on low-cost niches. Demand is reinforced by 12.4 million diabetes cases that underpin continuous glucose monitoring uptake and by rapid tech convergence that folds artificial-intelligence analytics into everyday laboratory workflows.

Mexico In-Vitro Diagnostics Market Trends and Insights

Rising Burden of Chronic Diseases

Mexico's 12.4 million diabetes population and cardiovascular mortality profile fuel high-frequency glucose, lipid, and HbA1c testing, pushing sustained reagent sales in the Mexico in vitro diagnostics market. Cancer incidence of 140.9 per 100,000, coupled with breast-cancer rates at 39.9 per 100,000 women, increases demand for tumor markers and molecular profiling. Post-COVID syndromes affecting 37% of survivors require long-term inflammatory and pulmonary panels, broadening test menus.

Urban clustering delivers high sample volumes to large labs, whereas rural regions still rely on outreach programs. Unique genomic traits, such as a 17% KRAS mutation prevalence in Mexican colorectal cancer versus 40% globally, underline the need for localized assay design.

Expanding Adoption of Point-of-Care and Decentralised Testing

The COVID-19 response normalized rapid antigen platforms across public clinics and laid the groundwork for wider POCT use in cardiology, obstetrics, and infectious-disease triage. Emergency departments in Mexico City documented turnaround-time drops that directly improved patient throughput. For the 52% of citizens living in towns under 100,000, handheld analyzers deliver laboratory-grade answers without major infrastructure. Private-sector innovators such as Examedi, in partnership with Laboratorios Chopo, now dispatch home kits that integrate telehealth oversight. AI-augmented POCT prototypes like the Buazduino-001 cardiovascular classifier achieve 87% accuracy and cut diagnostic time to two minutes, illustrating next-generation potential.

Stringent & Evolving COFEPRIS Regulatory Pathway

Revised NOM-137-SSA1-2024 labeling rules now demand explicit self-test instructions, disposal guidance, and country-of-origin data, extending dossier compilation timelines. New submissions still average 10-18 months, and deficiency letters lengthen the cycle to 26 months, tying up working capital. Five-year license renewals with 150-day pre-expiry dossier deadlines impose recurring costs. While equivalency programs shorten reviews for devices cleared in the United States, Canada, or Japan, domestic innovators lacking foreign approvals confront a steeper slope to market entry.

Other drivers and restraints analyzed in the detailed report include:

Government Universal-Healthcare Spend Surge & Bulk Procurement Reform / AI-Enabled Diagnostic Algorithms Integrated into IVD Workflows / Low Reimbursement Rates for Advanced Molecular Tests /

For complete list of drivers and restraints, kindly check the Table Of Contents.

Segment Analysis

Immuno-diagnostics generated the largest revenue share at 28.52% in 2024, underpinned by high-volume infectious-disease and hormone assays. In contrast, Molecular Diagnostics is set to log an 8.25% CAGR to 2030, the fastest within the Mexico in vitro diagnostics market. The segment's rise is tied to oncology sequencing, hereditary cancer panels, and pathogen detection workflows. Hereditary breast-cancer programs show that 32.7% of Mexican patients carry non-BRCA pathogenic variants that require broader gene panels. KRAS mutation testing reveals just 17% positivity in Mexican colorectal cancer, far below global averages, reinforcing the need for population-specific assay designs. Clinical Chemistry remains vital for diabetes management, while Hematology benefits from the PRONAI roadmap that strengthens childhood leukemia diagnostics in Oaxaca, Puebla, and Tlaxcala. Microbiology labs expand respiratory and Post-COVID surveillance panels, reflecting 37% prevalence of lingering symptoms among COVID survivors. Rapid-test formats advance in rural zones, leveraging AI-enabled readouts to cut operator error and improve traceability.

Reagents & Kits anchored 55.53% of 2024 revenue thanks to continuous demand for consumables in diabetes, infectious-disease, and routine chemistry testing. However, Software & Services is forecast to outpace all other categories at a 9.35% CAGR, reflecting Mexico's digital-health pivot inside the Mexico in vitro diagnostics market. Cloud-based middleware now offers real-time QC dashboards and cross-site connectivity, while AI modules such as Keiron's engine support triage and predictive maintenance. Government tenders already earmark funds for LIS upgrades under the consolidated procurement drive. Instruments/Analyzers

enjoy refreshed replacement cycles in public hospitals, supported by financing models that bundle reagent rentals. BiotecMol's PCR kits, priced between USD 10,000-30,000 for varying reaction volumes, prove demand for specialized reagents, particularly when paired with laboratory automation. Convergence of hardware and software fosters integrated ecosystems that simplify accreditation and data export to national cancer registries.

The Mexico In-Vitro Diagnostics Market Report is Segmented by Technique (Clinical Chemistry, Molecular Diagnostics, and More), Product & Service (Instruments/Analysers, Reagents and More), Usability (Disposable IVD Devices and Reusable Systems), Application (Infectious Disease, Oncology, and More), and End Users (Independent Diagnostic Laboratories, Hospitals and More). The Market Forecasts are Provided in Terms of Value (USD).

List of Companies Covered in this Report:

Abbott Laboratories / Roche / Siemens Healthineers / Danaher Corp. (Cepheid/Beckman Coulter) / bioMerieux / Thermo Fisher Scientific / Beckton Dickinson / Bio-Rad Laboratories / Sysmex Corp. / QuidelOrtho Corp. / QIAGEN / Illumina / Grifols / Seegene / Ortho Clinical Diagnostics (Topco) / Co-Diagnostics / Werfen Life Group SAU / HORIBA / Randox Laboratories / T2 Biosystems / Genomma Lab Internacional SAB de CV /

Table of Contents:

- 1 Introduction
 - 1.1 Study Assumptions & Market Definition
 - 1.2 Scope of the Study
- 2 Research Methodology
- 3 Executive Summary
- 4 Market Landscape
 - 4.1 Market Overview
 - 4.2 Market Drivers
 - 4.2.1 Rising Burden Of Chronic Diseases
 - 4.2.2 Expanding Adoption Of Point-Of-Care And Decentralised Testing
 - 4.2.3 Government Universal-Healthcare Spend Surge & Bulk Procurement Reform
 - 4.2.4 AI-Enabled Diagnostic Algorithms Integrated Into IVD Workflows
 - 4.2.5 Expansion Of Private Lab Chains & Retail Health Clinics
 - 4.3 Market Restraints
 - 4.3.1 Stringent & Evolving COFEPRIS Regulatory Pathway
 - 4.3.2 Low Reimbursement Rates For Advanced Molecular Tests
 - 4.3.3 Regional Inequality In Lab Infrastructure Outside Tier-1 Cities
 - 4.4 Regulatory Landscape
 - 4.5 Porter's Five Forces
 - 4.5.1 Threat of New Entrants
 - 4.5.2 Bargaining Power of Buyers

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 4.5.3 Bargaining Power of Suppliers
- 4.5.4 Threat of Substitutes
- 4.5.5 Competitive Rivalry

5 Market Size & Growth Forecasts (Value, USD)

- 5.1 By Technique
 - 5.1.1 Clinical Chemistry
 - 5.1.2 Immuno-diagnostics
 - 5.1.3 Molecular Diagnostics
 - 5.1.4 Hematology
 - 5.1.5 Microbiology
 - 5.1.6 Coagulation & Hemostasis
 - 5.1.7 Urinalysis
 - 5.1.8 Point-of-Care Rapid Tests
 - 5.1.9 Other Techniques
- 5.2 By Product & Service
 - 5.2.1 Instruments/Analysers
 - 5.2.2 Reagents & Kits
 - 5.2.3 Software & Services
- 5.3 By Usability
 - 5.3.1 Disposable IVD Devices
 - 5.3.2 Reusable Systems
- 5.4 By Application
 - 5.4.1 Infectious Diseases
 - 5.4.2 Oncology
 - 5.4.3 Cardiology
 - 5.4.4 Autoimmune Disorders
 - 5.4.5 Diabetes
 - 5.4.6 Nephrology
 - 5.4.7 Genetic / Prenatal / Neonatal
 - 5.4.8 Drug Testing & Pharmacogenomics
 - 5.4.9 Other Applications
- 5.5 By End User
 - 5.5.1 Independent Diagnostic Laboratories
 - 5.5.2 Hospitals & Clinics
 - 5.5.3 Home-care / Self-testing
 - 5.5.4 Other End Users

6 Competitive Landscape

- 6.1 Market Concentration
- 6.2 Market Share Analysis
- 6.3 Company Profiles (includes Global level Overview, Market level overview, Core Business Segments, Financials, Headcount, Key Information, Market Rank, Market Share, Products and Services, and analysis of Recent Developments)
 - 6.3.1 Abbott Laboratories
 - 6.3.2 F. Hoffmann-La Roche AG
 - 6.3.3 Siemens Healthineers AG
 - 6.3.4 Danaher Corp. (Cepheid/Beckman Coulter)

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 6.3.5 bioMerieux SA
- 6.3.6 Thermo Fisher Scientific Inc.
- 6.3.7 Becton, Dickinson and Co.
- 6.3.8 Bio-Rad Laboratories Inc.
- 6.3.9 Sysmex Corp.
- 6.3.10 QuidelOrtho Corp.
- 6.3.11 Qiagen N.V.
- 6.3.12 Illumina Inc.
- 6.3.13 Grifols S.A.
- 6.3.14 Seegene Inc.
- 6.3.15 Ortho Clinical Diagnostics (Topco)
- 6.3.16 Co-Diagnostics Inc.
- 6.3.17 Werfen Life Group SAU
- 6.3.18 Horiba Ltd.
- 6.3.19 Randox Laboratories Ltd.
- 6.3.20 T2 Biosystems Inc.
- 6.3.21 Genomma Lab Internacional SAB de CV

7 Market Opportunities & Future Outlook

7.1 White-space & Unmet-need Assessment
