

Total Lab Automation - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2025 - 2030)

Market Report | 2025-07-01 | 120 pages | Mordor Intelligence

AVAILABLE LICENSES:

- Single User License \$4750.00
- Team License (1-7 Users) \$5250.00
- Site License \$6500.00
- Corporate License \$8750.00

Report description:

Total Lab Automation Market Analysis

The total lab automation market is valued at USD 6.65 billion in 2025 and is forecast to reach USD 9.26 billion by 2030, advancing at a 6.82% CAGR. This expansion is propelled by the surge in high-throughput screening for drug discovery, escalating diagnostic test volumes, and the growing priority of error minimization in clinical and research settings. Robotics, artificial intelligence, and cloud connectivity now converge in fully integrated platforms that allow laboratories to optimize workflows, predict equipment failures, and analyze large datasets in real time. The shift toward modular designs helps smaller facilities embrace automation without committing to full "islands," while the spread of collaborative robots widens the addressable user base. Growing interest in precision medicine, stricter regulatory frameworks, and the rapid scale-up of cell and gene therapy manufacturing are also accelerating equipment upgrades and new installations across the total lab automation market.

Global Total Lab Automation Market Trends and Insights

Integration of AI-Enabled Predictive Maintenance to Minimise Downtime

Proactive analytics now monitor temperature, pressure, vibration, and motor load across thousands of data points, spotting anomalies hours before failure. High-throughput clinical labs report up to 30% fewer unscheduled stoppages and 15-20% longer asset life after embedding these algorithms into liquid handlers and track systems. Service calls drop, reagent waste falls, and scheduling becomes more predictable, directly raising asset utilization. Vendor dashboards keep technicians informed via mobile

www.scotts-international.com

alerts, allowing many interventions to be completed in minutes rather than hours. In North America, these gains shorten ROI cycles, making a stronger financial case for the next wave of automation upgrades.

EU IVDR-Driven Upgrade Cycle in Clinical Diagnostics

Europe's shift from the IVDD to IVDR has tightened documentation, traceability, and performance evidence requirements, spurring laboratories to replace aging systems with automated solutions that log every step. Middleware now auto-generates compliance reports, reducing manual paperwork and audit risk. Vendors answer with analyzer tracks that link bar-coded tubes to cloud repositories, ensuring data integrity across pre-analytical, analytical, and post-analytical phases. As the 2028 transition milestones draw closer, procurement pipelines in Germany, France, and the United Kingdom are filling with next-generation platforms certified under the regulation. The scramble for compliant hardware and software drives short-term demand across the total lab automation market.

Seven-Figure CAPEX and Lengthy ROI for True TLA Islands

Comprehensive islands that unite pre-analytical, core-lab, and post-analytical stages often cost well above USD 1 million, and installation stretches past nine months. Smaller hospitals and academic labs struggle to justify outlays when annual test counts remain modest. Financing packages and pay-per-sample models are emerging but remain limited in many regions. Where budgets are approved, lengthy validation and redundancy planning delay revenue realization. This dynamic tempers near-term penetration of the most integrated formats within the total lab automation market.

Other drivers and restraints analyzed in the detailed report include:

High-Throughput QC Needs for Cell & Gene-Therapy Manufacturing / Emergence of Decentralised & Virtual Clinical Trial Micro-Labs / Legacy Middleware Interoperability Gaps with Next-Gen Analyzers /

For complete list of drivers and restraints, kindly check the Table Of Contents.

Segment Analysis

Automated liquid handlers generated the largest revenue slice, securing 32% of total lab automation market share in 2024. Their precise aspiration and dispensing functions underpin assay reliability across diagnostics, drug discovery, and academic research. Advanced models feature pressure-based level sensing and cross-contamination checks, reinforcing their position at the heart of high-throughput platforms. As sample counts rise in precision medicine programs, demand for faster deck configurations and on-deck incubation grows, keeping this category firmly in front of the broader total lab automation market.

Robotic arms, while a smaller base, are expanding at an 8.8% CAGR, the quickest rate among hardware lines. Compact, six-axis designs now mount inside biosafety cabinets, handing off plates between incubators, imagers, and centrifuges without human touch. New gripper technologies handle cryo-vials and cell-culture flasks, widening their scope. Collaborative variants allow technicians to teach motions manually, reducing programming overhead. Greater flexibility and falling prices together unlock adoption in mid-volume labs, adding momentum to the overall total lab automation market growth.

LIMS accounted for 38% of total lab automation market size in the software layer during 2024. Acting as an operational backbone, modern platforms manage sample accessioning, chain of custody, instrument scheduling, and regulatory reporting. Recent releases embed AI modules that flag bottlenecks and recommend recipe tweaks, transforming LIMS into real-time optimization engines rather than passive databases. Integration APIs now link directly to hospital electronic records and manufacturing execution systems, positioning LIMS as a central node in digital health infrastructure.

www.scotts-international.com

Scientific data management systems posted the fastest advance at 10.2% CAGR. Exploding multi-omics datasets, coupled with imaging and high-content screens, exceed the capacity of spreadsheet-based archives. SDMS solutions lever automated metadata capture, versioning, and audit trails that satisfy both regulators and research reproducibility mandates. Machine-learning extensions pull insights from raw chromatograms or gene-expression matrices in minutes, slashing time to decision. As cloud storage costs continue to fall, subscription-based SDMS uptake should remain a robust tailwind for the total lab automation market.

Lab Automation Market Report Segments the Industry Into Equipment Type (Automated Liquid Handlers, and More), Automation Scope (Pre-Analytical Automation, and More), Software (Laboratory Information Management System, and More), Application (Drug Discovery, Genomics, and More), End-User (Pharmaceutical and Biotechnology Companies and More) and Geography. The Market Forecasts are Provided in Terms of Value (USD).

Geography Analysis

North America held 41% of total lab automation market share in 2024, supported by deep clinical research budgets, large reference laboratories, and early uptake of AI predictive maintenance. Equipment vendors provide on-site analytics support, accelerating time to value. Federal initiatives encouraging real-time data exchange across care networks also reinforce adoption. Canada's push for precision oncology and Mexico's expanding private hospital sector add complementary tailwinds, lifting regional revenues further.

Europe ranks second, with growth shaped by the IVDR transition that forces laboratories to modernize data capture and traceability. Germany, the United Kingdom, and France spearhead installations, often integrating automation into centralized core-lab hubs that serve multiple hospitals. Public-private genomics programs call for standardized sample handling, breathing fresh life into biobanking automation. Eastern European nations, leveraging European structural funds, are now replacing legacy middleware to align with continental data-governance rules, broadening regional penetration of the total lab automation market.

Asia-Pacific is the fastest-growing territory, posting a 7.9% CAGR through 2030. China's smart-hospital blueprints include mandated robotic tracks, spurring domestic production and joint ventures with Western suppliers. Japan emphasizes space-efficient robotics that fit cramped urban facilities, while South Korea accelerates high-throughput vaccine R&D supported by government subsidies. India sees a dual driver: global CRO investments and state-level health-scheme laboratories seeking standardized workflows. As regional supply chains mature, cost-effective platforms will likely capture incremental share across emerging Southeast Asian economies.

List of Companies Covered in this Report:

Thermo Fisher Scientific Inc. / Danaher Corp. (Beckman Coulter) / Roche Diagnostics International AG / Siemens Healthineers AG / Abbott Laboratories / Tecan Group Ltd. / Agilent Technologies Inc. / PerkinElmer Inc. (Revvity) / Bio-Rad Laboratories Inc. / QIAGEN N.V. / Inpeco SA / Hamilton Company / Hudson Robotics Inc. / SPT Labtech Ltd. / Swisslog Healthcare AG / BD (Kiestra) / LabVantage Solutions Inc. / LabWare Inc. / Opentrons Labworks Inc. / Perceptive Automation LLC / Yaskawa Electric Corp. / Eppendorf SE / Formulatrix Inc. / Biosero Inc. / Tecan Genomics Inc. /

Additional Benefits:

- The market estimate (ME) sheet in Excel format /
- 3 months of analyst support /

1 INTRODUCTION

1.1 Study Assumptions and Market Definition

1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET LANDSCAPE

4.1 Market Overview

4.2 Market Drivers

4.2.1 Integration of AI-Enabled Predictive Maintenance to Minimise Downtime

4.2.2 EU IVDR-Driven Upgrade Cycle in Clinical Diagnostics

4.2.3 High-Throughput QC Needs for Cell and Gene-Therapy Manufacturing

4.2.4 Emergence of Decentralised and Virtual Clinical Trial Micro-Labs

4.2.5 Rising Biobank Volumes Demanding Ultra-Cold Automated Storage

4.2.6 Government-Funded Smart-Hospital Build-outs (GCC and China)

4.3 Market Restraints

4.3.1 Seven-Figure CAPEX and Lengthy ROI for True TLA Islands

4.3.2 Legacy Middleware Interoperability Gaps with Next-Gen Analyzers

4.3.3 Cyber-Security and Data-Sovereignty Compliance Burden

4.3.4 Supply-Chain Volatility in Precision Mechatronics Components

4.4 Value / Supply-Chain Analysis

4.5 Regulatory or Technological Outlook

4.6 Porter's Five Forces Analysis

4.6.1 Competitive Rivalry

4.6.2 Threat of New Entrants

4.6.3 Threat of Substitutes

4.6.4 Bargaining Power of Buyers

4.6.5 Bargaining Power of Suppliers

5 MARKET SIZE AND GROWTH FORECASTS (VALUE)

5.1 By Equipment Type

5.1.1 Automated Liquid Handlers

5.1.2 Robotic Arms

5.1.3 Automated Storage and Retrieval Systems

5.1.4 Clinical Chemistry and Immuno-Analyzers

5.1.5 Automated Plate Handlers

5.2 By Software

5.2.1 Laboratory Information Management Systems (LIMS)

5.2.2 Scientific Data Management Systems (SDMS)

5.2.3 Electronic Lab Notebooks (ELN)

5.2.4 Laboratory Information Systems (LIS)

5.2.5 Chromatography Data Systems (CDS)

5.3 By Automation Scope

5.3.1 Pre-Analytical Automation

5.3.2 Analytical / Core-Lab Automation

Scotts International. EU Vat number: PL 6772247784

- 5.3.3 Post-Analytical Automation
- 5.3.4 Total Lab Automation (TLA) Islands
- 5.4 By Application
 - 5.4.1 Clinical Diagnostics
 - 5.4.2 Genomics
 - 5.4.3 Drug Discovery
 - 5.4.4 Proteomics and Metabolomics
 - 5.4.5 Biobank and Sample Management
- 5.5 By End-User
 - 5.5.1 Pharmaceutical and Biotechnology Companies
 - 5.5.2 Contract Research and Manufacturing Organizations (CROs / CDMOs)
 - 5.5.3 Hospitals and Diagnostic Reference Labs
 - 5.5.4 Academic and Government Institutes
- 5.6 By Geography
 - 5.6.1 North America
 - 5.6.1.1 United States
 - 5.6.1.2 Canada
 - 5.6.1.3 Mexico
 - 5.6.2 South America
 - 5.6.2.1 Brazil
 - 5.6.2.2 Argentina
 - 5.6.2.3 Rest of South America
 - 5.6.3 Europe
 - 5.6.3.1 Germany
 - 5.6.3.2 United Kingdom
 - 5.6.3.3 France
 - 5.6.3.4 Italy
 - 5.6.3.5 Spain
 - 5.6.3.6 Rest of Europe
 - 5.6.4 Middle East
 - 5.6.4.1 GCC
 - 5.6.4.2 Turkey
 - 5.6.4.3 Rest of Middle East
 - 5.6.5 Africa
 - 5.6.5.1 South Africa
 - 5.6.5.2 Nigeria
 - 5.6.5.3 Rest of Africa
 - 5.6.6 Asia-Pacific
 - 5.6.6.1 China
 - 5.6.6.2 Japan
 - 5.6.6.3 India
 - 5.6.6.4 South Korea
 - 5.6.6.5 Southeast Asia
 - 5.6.6.6 Rest of Asia-Pacific

6 COMPETITIVE LANDSCAPE

6.1 Market Concentration

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

6.2 Strategic Moves

6.3 Market Share Analysis

6.4 Company Profiles (includes Global level Overview, Market level overview, Core Segments, Financials as available, Strategic Information, Market Rank/Share, Products and Services, Recent Developments)

6.4.1 Thermo Fisher Scientific Inc.

6.4.2 Danaher Corp. (Beckman Coulter)

6.4.3 Roche Diagnostics International AG

6.4.4 Siemens Healthineers AG

6.4.5 Abbott Laboratories

6.4.6 Tecan Group Ltd.

6.4.7 Agilent Technologies Inc.

6.4.8 PerkinElmer Inc. (Revvity)

6.4.9 Bio-Rad Laboratories Inc.

6.4.10 QIAGEN N.V.

6.4.11 Inpeco SA

6.4.12 Hamilton Company

6.4.13 Hudson Robotics Inc.

6.4.14 SPT Labtech Ltd.

6.4.15 Swisslog Healthcare AG

6.4.16 BD (Kiestra)

6.4.17 LabVantage Solutions Inc.

6.4.18 LabWare Inc.

6.4.19 Opentrons Labworks Inc.

6.4.20 Perceptive Automation LLC

6.4.21 Yaskawa Electric Corp.

6.4.22 Eppendorf SE

6.4.23 Formulatrix Inc.

6.4.24 Biosero Inc.

6.4.25 Tecan Genomics Inc.

7 MARKET OPPORTUNITIES AND FUTURE OUTLOOK

7.1 White-Space and Unmet-Need Assessment
