Report description:

Based on connectivity technology, Australia hearables market share is led by wireless connectivity technology as they are convenient to use due to their portability. The Australia hearables market is augmented by the advantage of the technology that allows users to move freely without getting bothered by the wires of their devices, thus offering comfort and convenience. Moreover, they are also integrated with features including touch control, and voice assistant thus enhancing the overall performance. They are also compatible with other devices including smartphones, and laptops without any connector and as compared to the wired hearables they offer a lower risk of damage. Various trends guiding Australia hearables market development include the development of wireless connectivity technologies which connect with smartphones and tablets easily. Moreover, they are also incorporated with fitness tracking and heart rate monitoring systems which help individuals to track their overall health. They are also embedded with the active noise cancellations technology to filter out unnecessary noises and increase the overall experience of the users. To promote sustainability, the hearables are made with recycled and eco-friendly materials. In 2022, Sony introduced the CREC10 Self-Fitting OTC Hearing Aids in the Australian market which consists of prescription-grade sound quality and can be used continuously for up to 70 hours.
