Report description:

Market Overview

The Global Silicon Wafer Reclaim Market, valued at USD 5.39 Billion in 2024, is projected to experience a CAGR of 16.79% to reach USD 13.68 Billion by 2030. Silicon wafer reclaim refers to the process of refurbishing used or defective silicon wafers by stripping existing layers, cleaning, grinding, and polishing to restore their surface quality for reuse in less critical applications like equipment testing and process calibration. The market's growth is primarily driven by the imperative for cost reduction in semiconductor manufacturing and increasing sustainability mandates across the electronics industry.

Key Market Drivers

The Global Silicon Wafer Reclaim Market is significantly propelled by the imperative for cost optimization within semiconductor manufacturing. As fabrication processes become increasingly complex and capital-intensive, reclaiming used or defective wafers offers a crucial pathway to reduce operational expenditures without compromising non-critical applications such as equipment testing and process calibration. According to RS Technologies Co. Ltd. 's announcement, in March 2024, the company expanded its reclaim facility in Taiwan to meet increased demand from foundries and integrated device manufacturers for cost-effective 200mm and 300mm wafers. This strategic investment underscores the industry's commitment to leveraging reclaimed wafers for greater financial efficiency.

Key Market Challenges

One significant impediment to the growth of the global silicon wafer reclaim market is the difficulty in maintaining consistent quality for advanced semiconductor nodes. The increasing stringency of manufacturing requirements for next-generation devices demands exceptionally high and uniform surface quality. Reclaimed wafers, despite refurbishment, often struggle to meet these

www.scotts-international.com

precise specifications, limiting their application primarily to less critical uses such as test wafers or equipment calibration. This quality disparity directly restricts potential market expansion into mainstream production applications, where demand for pristine wafers remains paramount.

Key Market Trends

The growing adoption of reclaimed wafers is significantly driven by robust ESG and circular economy initiatives within the semiconductor industry. Manufacturers prioritize sustainability, actively integrating reclaimed wafers to reduce waste and conserve resources. A SEMI and imec collaboration in October 2025, for instance, established a framework to prioritize circularity for 69 distinct semiconductor materials, exemplifying this commitment. Onsemi's 2024 Sustainability Report highlighted a 65% waste diversion rate and a 48% water recycling rate in 2024. These efforts underscore reclaimed wafers' role in extending silicon resource lifespan and lessening virgin material demand.

Key Market Players

- Silicon Valley Microelectronics, Inc.
- Shinryo Corporation
- NanoSILICON, Inc.
- Siltronic AG
- NOVA Electronic Materials, LLC.
- Wafer World Inc.
- Phoenix Silicon International Corporation
- Silicon Materials, Inc.
- Noel Technologies, Inc.
- RS Technologies Co., Ltd.

Report Scope:

In this report, the Global Silicon Wafer Reclaim Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

-□Silicon Wafer Reclaim Market, By Diameter:

- o 150mm
- o 200 mm
- o 300 mm
- o Others

-□Silicon Wafer Reclaim Market, By Application:

- o Integrated Circuit
- o Solar Cells
- o Others

-□Silicon Wafer Reclaim Market, By Region:

- o North America
 - United States
 - Canada
 - Mexico
- o Europe
 - France
 - United Kingdom
 - Italy
 - Germany
 - Spain
- o Asia Pacific
 - China
 - India

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- Japan
- Australia
- South Korea
- o South America
- Brazil
- Argentina
- Colombia
- o Middle East & Africa

Competitive Landscape

Company Profiles: Detailed analysis of the major companies presents in the Global Silicon Wafer Reclaim Market.

Available Customizations:

Global Silicon Wafer Reclaim Market report with the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

-□Detailed analysis and profiling of additional market players (up to five).

Table of Contents:

1. Product Overview
 - 1.1. Market Definition
 - 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations
2. Research Methodology
 - 2.1. Objective of the Study
 - 2.2. Baseline Methodology
 - 2.3. Key Industry Partners
 - 2.4. Major Association and Secondary Sources
 - 2.5. Forecasting Methodology
 - 2.6. Data Triangulation & Validation
 - 2.7. Assumptions and Limitations
3. Executive Summary
 - 3.1. Overview of the Market
 - 3.2. Overview of Key Market Segmentations
 - 3.3. Overview of Key Market Players
 - 3.4. Overview of Key Regions/Countries
 - 3.5. Overview of Market Drivers, Challenges, Trends
4. Voice of Customer
5. Global Silicon Wafer Reclaim Market Outlook
 - 5.1. Market Size & Forecast
 - 5.1.1. By Value
 - 5.2. Market Share & Forecast
 - 5.2.1. By Diameter (150mm, 200 mm, 300 mm, Others)
 - 5.2.2. By Application (Integrated Circuit, Solar Cells, Others)
 - 5.2.3. By Region
 - 5.2.4. By Company (2024)
