Report description:

Software in the Netherlands

Summary

Software in the Netherlands industry profile provides top-line qualitative and quantitative summary information including: market size (value 2019-24, and forecast to 2029). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- Software market encompasses applications used for business operations (e.g., ERP, CRM, etc.), as well as infrastructure software that manages IT systems and operations. The market value represents the revenue generated from sales and subscriptions of various software packages and offerings. It includes both signed deals that remain under contract and the annual revenues associated with new contracts signed within a specific calendar year. This excludes sales opportunities for third-party service providers.
- The Dutch software market recorded revenues of \$11.7 billion in 2024, representing a compound annual growth rate (CAGR) of 10.2% between 2019 and 2024.
- The business process applications segment accounted for the market's largest proportion in 2024, with total revenues of \$2.8 billion, equivalent to 24.3% of the market's overall value.
- The expansion of the Netherlands' software market is driven by strong government support for digital innovation and rapid digitalization across sectors. National initiatives such as the Dutch Digitalization Strategy, Artificial Intelligence Strategy for the Netherlands, and the Digital Government Agenda (NL DIGIbeter) are promoting the modernization of public and private sector operations through ERP, CRM, and other business process applications.
