Report description:

Mexico Endoscopy Devices Market Analysis

Mexico endoscopy devices market size in 2026 is estimated at USD 1.04 billion, growing from 2025 value of USD 0.96 billion with 2031 projections showing USD 1.55 billion, growing at 8.31% CAGR over 2026-2031. Investments in nearshore production, rising gastrointestinal (GI) disease burden, and rapid adoption of artificial-intelligence (AI)-enhanced imaging systems remain the primary growth enablers. Northern border states attract medical tourism from 1.4 million to 3 million U.S. patients each year, pushing utilization rates and accelerating the replacement cycle for premium scopes. Hospitals in tier-1 cities deploy HD/4K and AI-enabled visualization platforms to cut missed polyp rates by up to 50% and reduce average hospital stays by 30% to 40%, aligning clinical outcomes with cost-containment objectives. Nearshoring shifts, supported by 25% lower production costs than the United States, provide local access to advanced devices while strengthening export capacity.

Mexico Endoscopy Devices Market Trends and Insights

Rising Demand for Minimally-Invasive Surgeries

Mexico's public and private providers prefer endoscopic interventions that shorten hospital stays by up to 40%, aligning with the IMSS-Bienestar mandate to optimize bed turnover. An aging population drives higher procedure volumes as cancer incidence climbs after 50 years of age. IMSS procurement now includes subrogated endoscopy services such as endoscopic ultrasound, indicating institutional commitment to minimally-invasive care. Border facilities like Hospital AZAR build dedicated endoscopy

www.scotts-international.com

suites to serve U.S. clientele seeking cost savings. The convergence of demographic pressure, institutional efficiency, and medical tourism sustains demand across the Mexico endoscopy devices market.

Growing GI Disease Burden & National CRC Screening Push

Colorectal cancer is now Mexico's second most lethal malignancy, and northern states report the highest incidence. Authorities promote fecal immunochemical testing with colonoscopy follow-up, creating predictable equipment demand. Limited organized screening programs-only two nationwide-leave significant unmet need, especially among individuals under 50 where cases rose 70% in three decades. Public awareness campaigns and physician advocacy reinforce the necessity of diagnostic endoscopy, boosting the Mexico endoscopy devices market.

Shortage of Certified Endoscopy Technologists

Advanced systems demand specialized staff, yet talent pools cluster in tier-1 metros, straining rural facilities. Training gaps hinder safe AI-enabled scope use; improper reprocessing raises infection risks. Burnout and career migration further widen the skills deficit, limiting the Mexico endoscopy devices market's reach into underserved regions. International programs offer models but require sustained funding.

Other drivers and restraints analyzed in the detailed report include:

Rapid HD/4K & AI-Enabled Imaging Upgrades
Border-Zone Medical-Tourism Inflow
Hospital-Acquired Infections From Reusable Scopes

For complete list of drivers and restraints, kindly check the Table Of Contents.

Segment Analysis

Endoscopy Devices retained 59.62% of the Mexico endoscopy devices market share in 2025, underscoring their indispensability for both diagnostics and therapy. Visualization Devices however are set to grow at a 9.63% CAGR through 2031 as providers migrate to HD/4K platforms integrated with AI detection. The Mexico endoscopy devices market size attributable to Visualization Devices is projected to rise sharply, benefiting suppliers such as Olympus that launched its EVIS X1 with advanced imaging in Mexico City. Flexible scopes dominate GI procedures, supported by high colorectal cancer incidence, while Rigid scopes serve ENT and orthopedics niches.

Single-use endoscopes represent the disruptive edge, buoyed by infection-control priorities. Ambu's plan to open a Mexican plant highlights local production advantages and export potential. Robot-assisted scopes remain limited to high-volume centers but illustrate a future precision trend in the Mexico endoscopy devices market. Operative devices such as resection systems and insufflators gain momentum as hospitals adopt therapeutic endoscopy to improve revenue capture and patient retention.

Gastroenterology commanded 42.10% of the Mexico endoscopy devices market size in 2025 due to the national GI disease load. ENT/Otolaryngology, however, posts the highest 10.12% CAGR because single-use nasal scopes reduce infection risk and enable office-based procedures. Sinus surgeries in border cities attract U.S. patients seeking affordable care, fuelling equipment turnover. Pulmonology benefits from AI imaging that improves lung lesion detection, whereas Urology grows with an aging male population requiring bladder and prostate interventions.

Cardiology remains a niche but is gaining awareness as minimally-invasive cardiac procedures prove cost-effective. Gynecology expands through hysteroscopy in women's health programs, while Orthopedics leverages arthroscopy for sports injuries.

Collectively these applications diversify demand, stabilizing the Mexico endoscopy devices market against single-segment shocks.

The Mexico Endoscopy Devices Market Report is Segmented by Device Type (Endoscopy Devices [Rigid Endoscopes, and More], Endoscopic Operative Devices [Energy & Resection Systems, and More], and Visualization Devices), Application (Gastroenterology, Cardiology, and More), End User (Hospitals, Specialty Clinics, and More) Usability (Reusable and Single-Use Endoscopes). The Market Forecasts are Provided in Terms of Value (USD).

List of Companies Covered in this Report:

Olympus Medtronic Boston Scientific FUJIFILM Johnson & Johnson (Ethicon Endo-Surgery) Conmed Karl Storz Stryker Smiths Group Ambu Cook Group Richard Wolf B. Braun Cantel Medical Intuitive Surgical, Inc. Pentax Medical Teleflex Innovamed Mexico Soluscope (SteriPack) Karl Storz Tijuana Mfg

Table of Contents:

- 1 Introduction
 - 1.1 Study Assumptions & Market Definition
 - 1.2 Scope of the Study
- 2 Research Methodology
- 3 Executive Summary
- 4 Market Landscape
 - 4.1 Market Overview
 - 4.2 Market Drivers
 - 4.2.1 Rising Demand For Minimally-Invasive Surgeries
 - 4.2.2 Growing GI Disease Burden & National CRC Screening Push
 - 4.2.3 Rapid HD/4K & AI-Enabled Imaging Upgrades
 - 4.2.4 Border-Zone Medical-Tourism Inflow
 - 4.2.5 Near-Shoring Of Endoscope Manufacturing In Baja California
 - 4.3 Market Restraints
 - 4.3.1 Shortage Of Certified Endoscopy Technologists
 - 4.3.2 Hospital-Acquired Infections From Reusable Scopes
 - 4.3.3 Service-Logistics Gaps Outside Tier-1 Cities
 - 4.4 Regulatory Landscape
 - 4.5 Porter's Five Forces
 - 4.5.1 Threat of New Entrants
 - 4.5.2 Bargaining Power of Buyers
 - 4.5.3 Bargaining Power of Suppliers
 - 4.5.4 Threat of Substitutes
 - 4.5.5 Competitive Rivalry

5 Market Size & Growth Forecasts (Value, USD)

5.1 By Device Type

5.1.1 Endoscopy Devices

5.1.1.1 Rigid Endoscopes

5.1.1.2 Flexible Endoscopes

5.1.1.3 Capsule Endoscopes

5.1.1.4 Single-use / Disposable Endoscopes

5.1.1.5 Robot-assisted Endoscopes

5.1.2 Endoscopic Operative Devices

5.1.2.1 Energy & Resection Systems

5.1.2.2 Insufflators & Fluid Mgmt Systems

5.1.3 Visualization Devices

5.1.3.1 Video Processors & Cameras

5.1.3.2 Light Sources & Displays

5.2 By Application

5.2.1 Gastroenterology

5.2.2 Pulmonology / Bronchoscopy

5.2.3 Urology

5.2.4 Cardiology

5.2.5 Gynecology

5.2.6 ENT / Otolaryngology

5.2.7 Orthopedics & Sports Medicine

5.2.8 Other Applications

5.3 By End User

5.3.1 Hospitals

5.3.2 Specialty Clinics

5.3.3 Ambulatory Surgical Centers

5.3.4 Diagnostic Imaging Centers

5.4 By Usability

5.4.1 Reusable Endoscopes

5.4.2 Single-use Endoscopes

6 Competitive Landscape

6.1 Market Concentration

6.2 Market Share Analysis

6.3 Company Profiles (includes Global level Overview, Market level overview, Core Segments, Financials as available, Strategic Information, Market Rank/Share for key companies, Products & Services, and Recent Developments)

6.3.1 Olympus Corporation

6.3.2 Medtronic plc

6.3.3 Boston Scientific Corporation

6.3.4 Fujifilm Holdings

6.3.5 Johnson & Johnson (Ethicon Endo-Surgery)

6.3.6 Conmed Corporation

6.3.7 Karl Storz SE & Co. KG

6.3.8 Stryker Corporation

6.3.9 Smith & Nephew plc

6.3.10 Ambu A/S

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 6.3.11 Cook Medical LLC
- 6.3.12 Richard Wolf GmbH
- 6.3.13 B. Braun Melsungen AG
- 6.3.14 Cantel Medical (STERIS)
- 6.3.15 Intuitive Surgical, Inc.
- 6.3.16 Pentax Medical (Hoya)
- 6.3.17 Teleflex Incorporated
- 6.3.18 Innovamed Mexico
- 6.3.19 Soluscope (SteriPack)
- 6.3.20 Karl Storz Tijuana Mfg

7 Market Opportunities & Future Outlook

7.1 White-space & Unmet-need Assessment
